

Product Safety Information

Zweihorn Naturtrend range

The Zweihorn division of the Akzo Nobel Wood Coatings GmbH hereby declares that Zweihorn-branded Naturtrend products do not contain any physiologically-relevant heavy metals such as lead, chrome, mercury or cadmium, and that the heavy metal content complies with EN 71-3 requirements (migration of specific elements). In addition, some Naturtrend products comply with the requirements for building biology set by the IBR (Institut für Baubiologie Rosenheim). The corresponding test certificates are available on our home page www.zweihorn.com.

In addition, they do not contain any organic toxic substances such as PCP (pentachloro-phenol), PCB, PCT (polychlorinated biphenyls and terphenyls), HCH (lindane), pesticides (permethrin), phenols, creosols or formaldehyde.

Furthermore, Zweihorn products that contain solvents only use solvents of certified and/or controlled purity. Fluoric chlorinated hydrocarbon and chlorinated hydrocarbons are avoided as are the following solvents that are classified as toxic: benzene, methylene glycol, ethylene glycol, methylene glycol acetate and ethylene glycol acetate. Nor do the products contain any allergenic terpenes such as citrus terpenes or turpentine oil.

Naturtrend products are based on natural and renewable raw materials. Naturtrend products are used to varnish children's toys and children's furniture.

The Zweihorn division guarantees that Zweihorn products do not include any raw materials classified or to be classified as "SVHC – substances of very high concern" on the official list of the REACH Regulation Appendix XIV.

The Zweihorn division is regularly checked by independent institutions for product quality and the manufacturing process.
